OTHER WORK EXPERIENCE:

Board Member, Saint Joseph Health System Lexington, KY 2008 – present:

The Saint Joseph Health System was established in December 2007 and became effective early 2008. Dr. Granacher is one of the founding directors of this new corporation. It is comprised of hospitals stretching from Bardstown, Kentucky, east to Martin, Kentucky, and south to London, Kentucky. It consists of the following healthcare facilities: Saint Joseph Hospital, Saint Joseph East, Flaget, Saint Joseph Mt. Sterling, Saint Joseph Martin, Saint Joseph Berea, Saint

Joseph London, and Saint Joseph Jessamine County. The current budget is approximately \$850,000,000 yearly revenue. Dr. Granacher also co-chairs the Quality and Process Improvement Committee. This committee is in charge of quality control for the eight facilities and also oversees credentialing for all physicians working in any of the eight facilities. Dr. Granacher oversees the credentialing of 1,800 physicians in the system.

**Board Member, Saint Joseph Healthcare
Lexington, KY 1994 - 2007:**

Dr. Granacher first joined the Board of Saint Joseph Healthcare in 1994. He was elected to the Board upon recommendation of William Fuchs, CEO of Saint Joseph Hospital. In 1997, he was elected Vice Chairman of the Board and was placed upon the Executive Committee. He assumed Chairman of the Board, July, 1999, and he served in that capacity as the first and only physician chair until July, 2002, while concurrently serving on the Executive Committee. He served on the Executive Committee as past Chairman of the Board, 2002 - 2007.

During Dr. Granacher's tenure as board chairman, he was intimately involved in oversight of the \$280,000,000 yearly budget. Notable achievements included acquisition of Jewish Hospital on Richmond Road and converting that to Saint Joseph Hospital, East. That hospital was upgraded, and the first long-term acute care hospital in Kentucky, within a hospital, was developed at that site. A five-story medical office building was added to the East campus. The entire medical and surgical services were upgraded, and bariatric surgery was added as a subspecialty practice. The Obstetrics Division increased its yearly deliveries 350% during Dr. Granacher's tenure.

At the main Saint Joseph Hospital campus, the entire sixth floor was renovated for use by the oncology service. Interventional cardiology expanded with an additional sixteen beds. The cardiac catheterization laboratory was expanded to a total of 14 patient bays. Surgical telemetry was expanded onto 3B with an addition of a 25-bed surgical telemetry unit. 5A was converted to a 16-bed stroke telemetry unit. 43 new private rooms were added, and the total telemetry beds were increased to 136.

Board Member, CHI Taskforce, 2007

Fifteen-member working committee to merge the following institutions: Saint Joseph Hospital, Saint Joseph East, Saint Joseph Berea, Saint Joseph Mt. Sterling, Saint Joseph Jessamine County, Marymount, Flaget and Our Lady of the Way

July-December 2007. Yearly budget \$700,000,000.

During Dr. Granacher's last years of service on the Saint Joseph Healthcare Board, intensive development began for the addition of an 8-story heart institute, adding 250,000 square feet. Positron Emission Tomography was added for use by the oncology service and for the analysis of complex brain disorders. Berea and Mt. Sterling hospitals were purchased and a new healthcare facility was established in Nicholasville.

Board of Directors, CBA Pharma (1989 - Present):

Dr. Granacher serves on the Board of this venture capital start-up pharmaceutical company. The company has a pending NDA for a product (CBT-1) for use as an adjunctive treatment reversing multiple drug resistance in cancer patients who are receiving chemotherapy. This product is currently moving to a new drug application with the FDA. In 2006, CBA Pharma entered contractual research agreements with the National Cancer Institute.
